

What's New in Ophthalmology Today?

Subspecialty Eye Care, Now Closer to You...

We are thrilled to have added two new doctors to our team, Anil Vedula, M.D. and Aarup Kubal, M.D., who complement the services already provided at our office. Both doctors specialize in cataract and refractive surgery, medical and surgical treatments of corneal diseases, and general ophthalmology. Dr. Kubal also specializes in the medical and surgical treatment of glaucoma.

Dr. Vedula attended Duke University as an undergraduate and the prestigious Yale School of Medicine for his medical degree, graduating in the top of his class. He completed his residency and fellowship at the Bascom Palmer Eye Institute, the nation's top residency program and eye hospital. While there, he performed novel research on corneal transplantation techniques and laser vision correction. Like Dr. Katz, he is currently a volunteer Assistant Professor at Bascom Palmer, where he teaches clinical and surgical ophthalmology to residents and fellows.

Dr. Kubal attended Harvard University as an undergraduate, where he graduated summa cum laude. He went on to earn his medical degree and residency from the Johns Hopkins Hospital in Baltimore, one of the nation's most prestigious medical institutions. He then completed a fellowship in cornea, glaucoma, and refractive surgery, learning new techniques in laser vision correction and minimally invasive glaucoma surgery. He spent a year in private practice in the Los Angeles area before relocating to south Florida to be closer to family.

Both physicians are pleased to be able to provide the same quality of care you have come to expect from Dr. Katz and are available for cornea and glaucoma consultations as well as general eye care at our office in Plantation.

RAANANAH S. KATZ, M.D., F.A.C.S.

CENTER FOR EXCELLENCE IN EYE SURGERY
